Results of questionnaire on the CSR report 2006

NTN conducted this survey in order to hear everyone's opinions about the CSR report. We would like to thank everyone who cooperated in this survey and present some of the results as below.

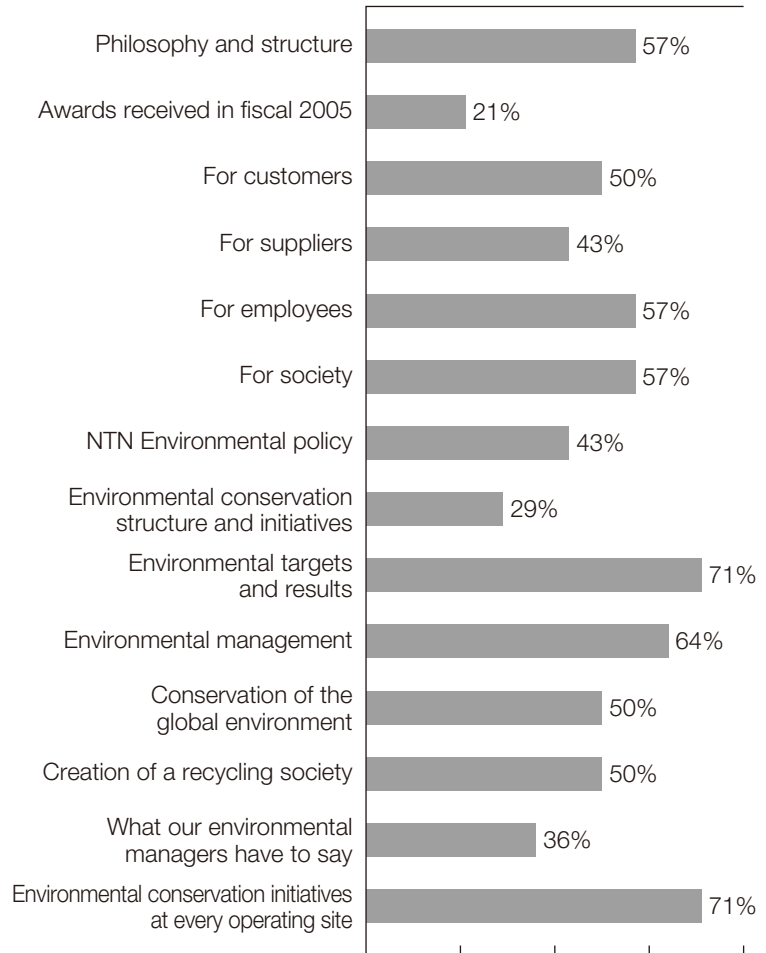

1 CSR report

2 NTN's efforts on CSR

3 Interesting sections of the CSR report 2006 (Multiple answers possible)

4 Opinions and suggestions on the CSR report 2006

(Suggestions on the report)

- It was composed of 3 sections and very informative to understand NTN's corporate philosophy emphasizing "Mono-zukuri" friendly to environment, individuals and communities.
- CSR activities were explained by stakeholder and easy to read and understand.
- Enthusiasm toward the initiatives of environmental conservation was understood quite well.

(Suggestions on CSR initiatives)

- For instance, development partners exist in the development of environmentally friendly products. It was believed that global cooperation is the most important thing.
- Patient efforts are much appreciated.

- Continuing social contribution activities are requested in the future.
- A good initiatives at one NTN site should be mandatory at all NTN sites.

(Opinions on improvements, etc.)

- In the social report, the efforts would be further emphasized if it contains data in the description from the viewpoint of "Target-Results".
- "What environmental managers have to say" was interesting. Greater affinity would be felt if their photos at each site were found in the report.
- It may be better to include more on-site voices from facilities. Continuing effort to protect the environment is requested for the future.
