

# NTN TECHNICAL REVIEW No.89

## CONTENTS

|  |   |            |
|--|---|------------|
| <b>Preface</b>                                   | <b>Special Issue “Strengthening the Services and Solutions Business and Responding to the Shift to EVs and Automotive Electrification.”</b><br>Masaki EGAMI   | <b>1</b>   |
| <b>Contribution</b>                              | <b>The Current Situation of Condition Monitoring and Diagnosis of Machine Systems</b><br>Tsuyoshi INOUE, Ph.D. Professor, Department of Mechanical Systems Engineering, Graduate School of Engineering, Nagoya University | <b>2</b>   |
| <b>Service and Solution Related Technologies</b> |   |            |
|  | Efforts for Service & Solution Business in NTN<br>Hiroyuki KUREBAYASHI  | <b>23</b>  |
|  | Development of Remaining Useful Life Prediction Technology for Rolling Bearings Under Flaking Progression<br>Masashi KITAI  | <b>29</b>  |
|  | Development of Sensor Integrated Bearing “Talking Bearings™”<br>Yasuyuki FUKUSHIMA, Tomomi GOTO, Yosuke TOYOGUCHI, Daigo IKKE, Kohei MATSUBAYASHI   | <b>35</b>  |
|  | Development of Multi Track Magnetic Encoder Integrated Rolling Bearing<br>Hiroshi OKUMURA, Hiroyoshi ITO, Yasuyuki HAMAKITA   | <b>41</b>  |
|  | Development of Sensor Integrated Bearing Unit for Machine Tool Spindles<br>Shohei HASHIZUME, Yudai NAKANO, Daichi KONDO, Yoji OHGUCHI, Yohei YAMAMOTO   | <b>47</b>  |
|  | Bearing Diagnostic Edge Application for Industrial IoT Platforms<br>Yudai NAKANO, Takashi HASEBA  | <b>53</b>  |
| <b>EV and Electrification-Ready Technologies</b> |   |            |
|  | NTN’s Activities for Electric Vehicle and Electrification of Automobile<br>Ikuya TATEOKA  | <b>58</b>  |
|  | Introduction of Rolling Bearings for Electric Drives Corresponding of Automobiles<br>Takashi KAWAI, Tomohisa UOZUMI   | <b>65</b>  |
|  | Evolution of Fixed Constant Velocity Joint that Contributes to Environmental Protection<br>Masashi FUNAHASHI, Teruaki FUJIO, Ritsuki SAKIHARA   | <b>73</b>  |
|  | Introduction of Composite Material Products Used in Electrical Auxiliaries for Automobile<br>Ken YASUDA, Shinji KOMATSUBARA   | <b>79</b>  |
| <b>Evaluation and Analysis Techniques</b>        |   |            |
|  | A Life Estimation Method of Peeling in Rolling Bearings Under Mixed Lubrication Conditions<br>Naoya HASEGAWA, Takumi FUJITA, Michimasa UCHIDATE, Masayoshi ABO  | <b>85</b>  |
|  | Development of Technical Calculation Systems for Rolling Bearings<br>Tomomi ISHIKAWA, Hiroyasu HIRUKAWA, Mariko IZUMI, Cedric BURNET  | <b>91</b>  |
| <b>New Product Introduction</b>                  |   |            |
|  | Development of Feeder “TRINITTE” for Picking Robots<br>Shuhei MATSUI  | <b>96</b>  |
|  | Product Introduction of Compact Torque Diode (TDL8)<br>Masayuki OHARA   | <b>99</b>  |
|  | Application Examples of the Wrist Joint Module “i-WRIST™”<br>Yuzuru TANAKA  | <b>102</b> |
| <b>Award Winning Products</b>                    |   |            |
|  | Low Friction HUB Bearing III<br>Makoto SEKI   | <b>106</b> |
|  | High Speed Deep Groove Ball Bearing for EV/HEV<br>Goro NAKAO, Katsuaki SASAKI, Yukihiro ISHIDA, Kazunori MURANUSHI  | <b>107</b> |
|  | Development of Super Long-Life Tapered Roller Bearings for Automobile<br>Hiroki FUJIWARA, Takashi KAWAI, Chikara OHKI   | <b>108</b> |
|  | Low Friction Technology of Sealed Ball Bearings for Transmission<br>Tomohiro SUGAI, Katsuaki SASAKI, Takahiro WAKUDA  | <b>109</b> |
|  | Estimation Method of Micropitting Life from $S-N$ Curve Established by Residual Stress Measurements and Numerical Contact Analysis<br>Naoya HASEGAWA, Takumi FUJITA, Michimasa UCHIDATE, Masayoshi ABO, Hiroshi KINOSHITA | <b>110</b> |
|  | DLC Coating Spherical Roller Bearing for Wind Turbine Main Shaft<br>Kazumasa SEKO, Takashi YAMAMOTO, Masaki NAKANISHI   | <b>111</b> |
